

# San Francisco's Healthy Nail Salon Program

## Ventilation Systems

**Thank you for participating in San Francisco's Healthy Nail Salon Program. In order to become recognized as a healthy nail salon, your salon must comply with the 9 criteria outlined in our registration form and submit an application form. One of the 9 criteria is to install a ventilation unit if your salon performs acrylic artificial nail services. Please note:**

- **The ventilation units will be one of the units outlined below**
- **The filters will need to be replaced within 6 months to 1 year of use, depending upon total usage of the ventilation unit**
- **In order to remain in the Healthy Nail Salon Program, San Francisco's Department of Environment will check for proof of purchase of air filters after one year of use**

### Effective Ventilation:

- Keep flexible hose near breathing zone to capture and remove contaminants at the source before it reaches the air you breathe
- HEPA (High Efficiency Particulate Air) filter capture **dust particles**
- Activated charcoal/carbon captures **vapor molecules**
- Combination of HEPA filter and pre-filter and activated charcoal is ideal

### Maintenance:

- It is critical to change out the activated carbon and HEPA filters to keep the system working properly
- Refer to the manufacturer recommended schedule when to replace filter and activated carbon
- Some manufacturers will mail you the filter and activated carbon when a maintenance is needed
  - Example: Salon Pure Air ships and bills replacement filters automatically every 4 months
- Make sure to turn the system on each day

### Replacement Signs:

- Has suction been significantly reduced on your source-capture ventilation? Have you tried cleaning the filter and still doesn't bring back suction? Try replacing pre-filter. Check pre and final filters
- Are odor fumes no longer being reduced in the salon? Replace activated carbon (every 3-4 months with normal usage)

### Tips:

- Keep records on when the filters need changing and notify everyone in the salon to keep track

Manufacturer	Contact Name & number	Model Name	Protects against	Cost			Link to the website
				Base Cost	Maintenance (depending on usage)	Monthly Installment Amount	
Air Impurities Removal System	Amy Roulier 1-800-236-1889 Ext.182	Salon PureAir Revolution	Fumes and Dust	\$1495 Add \$233.59 for extra arm	Pre filter: \$46.62 HEPA Filter: \$201.18	None	<a href="http://www.airsystems-inc.com/product/spa-rev-salon-pure-air-revolution/">http://www.airsystems-inc.com/product/spa-rev-salon-pure-air-revolution/</a>
